

# Is your Post-Acute Care facility impacted in the shifting healthcare landscape?

As pay-for-performance quickly supercedes fee-for-service payment model, increasing pressure is being placed on PAC Providers to:

- Drive down costs, while simultaneously demonstrating improved clinical outcomes
- Meet the challenges for growing patient volume through engaged collaborative partnerships
- Mitigate loss of LOS (Length Of Stay) days
- Understand and partner with hospitals and stay relevant in the Episode Payment Model (EPM)

## We can help.

Our innovative predictive analytics tool - PQ Predict coupled with medical and financial experts, can help in analyzing information from historical and current clinical and non-clinical data for both ACH and PAC providers. We can help in :

- ★ Lower ACH's episode cost by lowering readmissions
- ★ Increase patient quality of care
- ★ Make a value case to ACH in the bundled payments model
- ★ Increase volume by making value prop. case to ACH by risk sharing
- ★ Get shortlisted in ACH's preferred provider network
- ★ Stay relevant in the value-based model by creating strategic partnerships with your ACH
- ★ Provide real-time patient monitor and increase quality of care
- ★ Make your organization become part of the solution in the continuum of care.

# Turnkey Solutions

## PQuintile

PQuintile™ is based on combining clinical knowledge, data mining, and insights (meta-analysis) in providing 'actionable' predictive information on care outcomes along with simulation to run various payment modelling options.

### PQ Predict (Lite)

Predictive analytics platform to understand payments, physicians, patients and providers.

### PQ Care

Integrated point of care solution for clinical/non-clinical staff of the ACH.

## PQuintile Benefits & Features

### Benefits

- Target high variation areas for care redesign
- Focus on largest savings opportunities
- Avoid penalties for readmission
- Tailor gain sharing arrangements critical to care redesign
- Improve "Spillover" to Payers
- Identify variation in episode costs
- Improve discharge planning and the efficiency

### Features

- Enable value conversation with hospitals
- PAC facility performance monitoring
- Patient monitoring and tracking
- Multi-channel communications platform for improved care quality

**Our engagement model is easy and fast. We can implement this project with one week of discovery and 4 weeks of study to deliver insights, and propose recommended strategies.**
